GREETINGS FOR 1951

Adam was a gardener, and God
Who made him sees
That half a proper gardener's work
Is done upon his knees.

—Kipling

This little folder represents my twentieth mile-stone in commercial flower growing and I wish to thank all who made the past season one of the most pleasant I have ever experienced. The weather for most part was ideal and my flowers were never more beautiful. I won 5 firsts and Grand Champion on my dahlias and glads at two flower shows last fall.

As always it was such a pleasure to welcome so many visitors to my garden and it was especially nice to meet in person those from other states who have been faithful customers for so many years. I enjoy serving all you nice people and hope I may have that privilege for many more years. Thanks again and all good wishes.

My dahlias produced so many nice roots last season that I am glad to be able to make a substantial reduction in prices of most of them—but order early as I most always run out of some kinds. Tell me when you want your bulbs and I will try to send at that time.

All bulbs and plants are state inspected—guaranteed true to name, ad to reach you in good growing condition. If not satisfied, let me know at once and I will make adjustment.

All orders amounting to \$1.00 or more are sent post-paid—if less than \$1.00 please add 10c for postage. Stamps accepted for orders of less than \$1.00.

SPECIAL OFFER—Seven unlabeled dahlia roots \$1.50.
These are varieties that became mixed in handling
and some that I did not have in sufficient quantities
to list by name. Mostly large kinds—some very finest.

A FEW POINTERS ON DAHLIA CULTURE

Plant tubers 4 to 6 inches deep and about three feet
apart in well worked soil. I usually plant from May 20th
to June 10th. Do not plant near buildings or trees—
they do best in full sun. Keep top soil stirred, allow no
crust to form and keep free of grass and weeds. Do not
water unless very dry—then soak thoroughly once a
week—a slight sprinkling will do more harm than good.
As the buds develop in groups of three—remove the two
side buds leaving only the middle or terminal bud and
you will have large flowers with longer stems.
